

Summit County IT Strategic Goals for 2016

Disaster Recovery Improvements and business continuity roadmap

- Reevaluate the Disaster Recovery plan in place and improve speed and reliability of backups and restores.
- Work with other entities to have mutual warm or hot site agreement

GIS

- Work with Health Department to incorporate GIS to improve decision making on issues regarding area or land.
- Continue modifying weed tracking with GIS.
- Expand on use of ArcGIS Online for employees and the public to use.

Research and determine best needs for offices which would like to improve IT strategies

- Attorney
- Engineer
- Emergency Management

Software Upgrades

- Kronos upgrade
- Sire to Hyland
- Determine path for Microsoft products

Staff development and training

- Require staff to complete training in job role
- Encourage staff to keep abreast of current technology trends
- Attend in person and online training

VDI and Remote Workforce

- Ramp up Citrix XenDesktop as a viable solution for more employees
- Build reliable and fast network

Equipment Upgrades

- Network equipment in Justice Center and Richins Building
- Move audio equipment currently in Council Chambers
